

JIM HUGGINS

Co-Founder/CEO and Producer

Leadership. Vision. Dedication. Ability. These are some of Jim's key attributes. But the attribute he enjoys the most is storyteller.

A decorated Air Force officer, leadership and management are not strange concepts to Jim. They are hallmarks that, along with his faith, define him. With over 27 years of experience developing new technologies at all levels, both in the civilian community as well as the military, Jim possesses the rare combination of vision and the ability to "make it happen".

Recognizing the need for family-oriented films in today's world, Jim has focused these abilities on the world of entertainment. His experiences include theater, commercial campaigns, voiceovers, printwork, and even feature film. An award-winning stage actor, experienced director, and professionally trained TV/Film actor, Jim understands the entire spectrum of how to tell stories and tell them well. Couple that with a genuine desire to be a storyteller that glorifies God and you have an unbeatable (and unstoppable) combination!

Jim began his career in the Air Force after graduating from college with a B.S. in mathematics and an emphasis in a then-new field: Computer Science. As the Executive Officer (XO) for the largest directorate in Space Command, he was responsible for 350 military and civilian employees and over 56 million lines of code controlling our nation's missile warning and space defense systems. A newly promoted First Lieutenant, he was also the youngest ever selected for this job; a position normally held by a more senior officer.

Following a string of successes that ultimately took him to the Pentagon, Jim then moved from the Active Duty forces to the Reserves. But service to his country was still paramount. He volunteered to serve in a selectively manned position at HQ US Central Command in support of Operations Desert Storm and Southern Watch in Iraq and Restore Hope in Somalia.

Believing that lessons from the past are vital to our success in the future, Jim then volunteered to share his experiences from the Middle East with the next generation of Air Force leaders training in ROTC. An accomplished public speaker, Jim brought topics such as "Islamic Fundamentalism" and "The Laws of Armed Conflict" to life for these 3rd and 4th year cadets.

In parallel with his military career, Jim's newfound civilian career moved upward with ever-increasing responsibilities and challenges as well. He met the challenges of developing new technologies and managing a global startup company with huge parents (AMR and CSX). Upon leaving these corporate giants, Jim helped start a new company specializing in custom software business solutions. In less than a year, the company became a national success with award-winning recognition for customer service.

Along the way, Jim earned his M.S. in Engineering and a Ph.D. in Engineering Management focused on software engineering. He's a graduate of Squadron Officer School and Air Command and Staff College. He's earned the Master Space Operations badge and his numerous personal awards include the Defense Meritorious Service Medal, two Joint Service Commendation Medals, and the Air Force Commendation Medal, just to mention a few.

A dedicated father with three children, Emma, David, and Samuel, Jim and his wife, Leslee (along with two rescued German Shepherds) make Somerset, MA their home. Always engaged on the forefront of new initiatives, whether the battlefield is on foreign soil, encapsulated within the American economy, or represented by the entertainment industry, Jim understands what it means to face problems, create solutions, and think "outside the box". Jim is a problem-solver who enjoys challenges!
